Komite ng Pilipinas

June 29, 2021

Dear Sir / Madam,

Greetings!

We hope all is well with you. The **Association of Structural Engineers in the Philippines**, in collaboration with **ICOMOS Philippines, Bakas Pilipinas, Inc.**, and the **De La Salle College of Engineering**, invites you to attend the International Conference on "**Engineering for Heritage Structures**" (**EnHERiT**) on August 7 & 14, 2021 via ZOOM Cloud Meeting Apps.

The approach, philosophy, and set of design principles for the structural engineering of existing and historic buildings are different from those in conventional structural engineering. The work requires an understanding of original construction systems, the cause and mechanism of failure or safety, and if over the course of decades and centuries the building has settled into a new load path. For this work, research, conditions assessment, and non-destructive testing and modeling are essential. Methods, materials, and designs will be discussed with the perspective of weathering mechanically or chemically well over time, and ensuring longevity of the historic or existing structure.

In this regard, we have the honor to invite you and other engineers in your organization to attend this conference. Attached herewith is a flyer for your reference.

You may register to the link below:

Looking forward to your support on this endeavour! Thank you.

Very truly yours,

ADAM C. ABINALES, M.ENG, F.ASEP, P.P.
Chairman, CPD Committee

RONALDO S. ISON, F.ASEP
President
